Objective
I am seeking full-time Software Development work in an environment that values collaboration, growth and learning, and empathy for employees and users. I'm looking to tackle ambitious technical challenges across the full stack with curiosity, flexibility and creativity.

Technical Skills
Languages: Ruby, Javascript, CSS/SASS, SQL/PostgreSQL
Frameworks & Libraries: Rails, React/Redux, Backbone/Marionette

Other Skills
Process-oriented: proactive time budgeting, detailed kanban management, UX-centered development
Vulnerability: unafraid to ask questions, identify and document areas for code and professional growth

Experience
Frontend Development Intern, ModOp | June – September 2016
- Paired with senior developers on single-page apps for clients including Nike, Intel and Ubisoft
- Worked across the ModOp stack: front end architecture and UI with Backbone/Marionette, responsive mobile-first SASS with Foundation 6, build processing with Webpack
- Other projects included optimization of the agency's boilerplate, refactoring CSS from past projects for cleaner legacy code

Web Development Student and Apprentice, Code Builders | October 2015 – June 2016
- Full-stack software development with emphasis on the Ruby on Rails stack: Ruby, Rails, PostgreSQL, HTML5/CSS3 (SASS, Bourbon, Bootstrap), JavaScript (jQuery & React)
- Agile development (TDD with RSpec) and workflows (Github, PivotalTracker, Slack & Trello)

Program Analyst, Instruction & Innovation, Highline Public Schools | March 2014 – August 2015
- Managed and analyzed budget and expenditure database tracking $30 million across 20 state, federal and private grants
- Improved the database's data entry rate, increased speed of reporting, simplified user interaction by applying principles of UX to optimize budget-planning tools
- Project management for annual $800,000 Title II, Part A federal grant application

Assistant to Vice President, Admissions, Teach For America | August 2012 – March 2014
- Supported monthly budget forecasting by creating and optimizing budget tracking systems, publishing expenditure projections, investigating and resolving compliance risks
- Project management for team conferences ranging from 30 – 200 attendees

Education
Code Builders | October 2015 – June 2016
Six-month intensive web development bootcamp, culminating in contract work for Code Builders dev shop clients

School of Visual Concepts | Spring & Summer 2013
Introductory and intermediate courses in User Experience

University of Puget Sound | 2005 – 2009
- B.A. International Political Economy (Cum Laude, Phi Beta Kappa)
- Minors in Mandarin Chinese and Asian Studies
